

Meet the New Smart Si

Great features. Great price.

ecobee is proud to introduce our latest product: the Smart Si thermostat. Offering another easy, smart, energy solution for the home, the Smart Si delivers the quality, innovation and great features you would expect from ecobee—all at a great price.

More than just a thermostat

- Wi-Fi**
- Cool Mobile Apps**
- Easy Web Portal**
- Live Weather**
- Color Screen**

vivid colors highlight an easy-to-use interface

vibrant backlit buttons

contemporary design

live weather forecasts

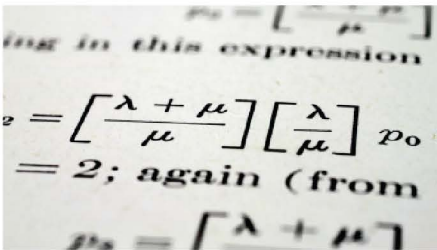

What makes the Smart Si so great?

Easy.

The Smart Si is Wi-Fi enabled, so your customers can make adjustments to their thermostat program on the go from their tablet, computer, iPhone or Smart Phone. An easy to read high-resolution color display, sleek buttons, and an intuitive user interface makes it easy to quickly set a personalized program, adjust the settings and create new vacation events whenever and wherever.

Smart.

The Smart Si has a built-in live weather function and uses advanced algorithms so your customers can be sure that their thermostat is always saving the most energy possible. (Now that's smart!) Contractor branded alerts and reminders notify both you and your customers when their HVAC equipment is due for service, if there is an equipment malfunction or when a filter change is needed - keeping your company top-of-mind.

Green.

A research study conducted by the ecobee Energy Modeling Team found that ecobee customers save an average of 26% on their annual energy costs!

The proof is in the research!

- Over 80% of ecobee users are running a program on their thermostats
- ecobee users are saving an average of 26% a year on their energy costs
- 78% of users who have downloaded the app access it at least once a week
- 65% of ecobee users log on to their web portal at least once per week
- 96% would recommend ecobee to their friends
